MOISTURE METER 6200

Limit Non-destructive moisture meter in a compact design. The instrument is used to detect moisture and water damage in wood and other construction materials, as well as to indicate the presence of pipes, electrical wires and rebars to a depth of approx. 40 mm. Capacitative measuring method with a high-frequency dielectric field. Provides a quick indication of the moisture content of the material. Move the detector over the surface and read the moisture values in the display. The backlit display also shows the air temperature. Temperature compensated for greater measuring accuracy. Supplied complete with 9 V battery. Manual included.
