

LUNA AXES

Luna has a wide range of axes from small axes, perfect for fine chopping wood, to larger axes for tree felling and coarse splitting. Handles are available in both hickory and fibreglass, with friction zones for a better grip in damp weather conditions. The curved design of the handle provides good support and power in all situations. The axe edge is precision hardened to ensure high durability and long intervals between regrinding. All axes are prepared for tool fall protection. All our axes are supplied with heavy duty leather edge guards.
