

LUNA CARPENTER'S HAMMERS

We sold our first hammer in 1917. Since then we have continuously developed our hammer range together with Nordic craftsmen. The grip on our hammers has been designed to fit perfectly in your hand, and to work perfectly in all seasons. The material selection and design create a firm grip, even when in rain and freezing temperatures. All our hammers are prepared for tool fall protection.

FULLY FORGED HAMMERS

FULLY FORGED HAMMER L-EVO

- Carpenter's hammer forged in one piece
- Advanced design provides greater impact in relation to weight
- Design reduces vibrations between face and handle
- Magnetic nail holder
- Curved, extra thin ground claw allows you to easily grip under nails or mouldings
- Ergonomic handle with special rubber for a good grip and comfort whatever the weather
- End stop with hole for tool fall protection

FULLY FORGED HAMMER LF

- Carpenter's hammer forged in one piece in a flexible design
- Curved thin ground claw allows you to easily grip under nails or mouldings
- Ergonomic handle with special rubber for a good grip and comfort whatever the weather
- Heavy duty end stop reduces risk of dropping the hammer
- Hole for tool fall protection

FULLY FORGED HAMMER LFN

- Carpenter's hammer forged in one piece in a flexible design
- Head with magnetic nail holder
- Curved thin ground claw allows you to easily grip under nails or mouldings
- Ergonomic handle with special rubber for a good grip and comfort whatever the weather
- Heavy duty end stop reduces risk of dropping the hammer
- Hole for tool fall protection
