

About Tormek

Tormek is fully focused on sharpening. All of the product development, engineering work and production is done in the small town of Lindesberg in Sweden. The production is carried out in close cooperation with selected suppliers, all specialized and the best in their fields. This ensures the highest quality and a continuous access to the best and most modern manufacturing technology. The Tormek Way of Sharpening is gentle and precise and does not remove more steel than necessary, which prolongs the lifetime of your tools.

Accessories

You can supplement your T-4 Bushcraft with jigs and accessories for various tools, based on your needs. Chisels, drill bits, scissors and woodturning tools are examples of other tools that you can sharpen with the Tormek T-4 Bushcraft. Below is a few of the products we offer, visit tormek.com to discover our full selection.

Long Knife Jig

Suitable for long and flexible knives. The 140 mm (5½") width of the jig stabilizes a thin blade. Minimum blade length 160 mm (6¼").

Small Knife Holder

Enables you to sharpen the smallest knife blades like carving knives and pocket knives. Works in conjunction with the SVM-45 jig.

Truing Tool

Trues the grindstone exactly round and flat. Guided by the Universal Support, which also guides the jigs. Dual knobs for smooth feed across the stone.

Machine Cover

For protecting the machine from shavings and wood dust. 100 % cotton.

Technical specifications

Dimensions

Width 230 mm (9¼")
Depth 200 mm (7⅞")
Height 260 mm (10¼")

Weight

Shipping weight 9.8 kg
Machine only 8.0 kg

Grindstone

Tormek Original Grindstone
Aluminium oxide
Ø 200 x 40 mm (8" x 1½")
120 rpm, torque 8.4 Nm

Leather Honing Wheel

Ø 145 x 26 mm (5¾" x 1")

Main Shaft

Stainless steel main shaft
and stone hardware.
EzyLock in composite.

Housing

Zinc cast top
Impact resistant ABS plastic

Motor

Industrial single phase
120 W (input)
230V, 50Hz or 115V, 60 Hz
Duty 30 min/hour
Maintenance free
Silent running, 54 dB
Min. 10,000 hour life

SHARP KNIVES AND AXES

PREPARE FOR NATURE

Tormek T-4 Bushcraft Edition

Sharpen your knives and axes professionally and make them ready for hunting and outdoor life. The Tormek T-4 Bushcraft is versatile and easy to use. You decide the edge angle and adjust the grinding according to your requirements.

With the Tormek T-4 Bushcraft, you can sharpen a wide variety of outdoor knives, hunting knives, fishing knives and different axes. The grinder is equipped with Tormek's Original Grindstone which gives you two different cutting actions in one wheel. You can easily alternate between a coarse sharpening at 220 grit and a fine sharpening having a surface equivalent to 1000 grit. This means that you can both restore a destroyed tool and make it as new again but also easily just touch up a blunt tool. By finishing the sharpening process on the leather honing wheel, you polish the bevel and remove the burr which develops during grinding. This gives your tool the maximum sharpness and a polished edge which lasts for a long time.

Tormek T-4 Bushcraft has a solid cast frame of zinc in which the machine's vital components such as motor, main shaft and sleeves for the Universal Support are integrated. The lower housing is made of impact resistant ABS plastic. This design means a shock-resistant and stable machine with an unbeatable precision. Thanks to the integrated handle, you can easily move the machine when needed.

Sharpen knives

With the included Knife Jig you can sharpen most knives. Jig width 45 mm (1 3/4"). Long knives need to be stiff. Minimum blade length 60 mm (2 3/8").

Sharpen axes

The included Axe Jig helps you to keep your axes sharp. Max height of axe 170 mm (6 1/2"). Copes with both straight and curved edges.

TIP! on our YouTube channel you will find instructional videos showing step by step how to get the edge back on your tools in a simple way.

Tormek Sharpening Innovation

The Bushcraft package includes the jig for knife sharpening SVM-45, jig for axe sharpening SVA-170, together with all the standard accessories: Stone Grader SP-650, AngleMaster WM-200, Honing Compound PA-70 and Tormek's Handbook.
