# STREAMLINE YOUR WORKFLOW

**TAILOR YOUR TOOL SOLUTION TO YOUR NEEDS**

TengTools offer a modular tool system that is built to last.

Build your ultimate tool kit with our large selection of storage and tool sets enabling customised tool solutions for any kind of industry or profession.

Don't waste space and money on tools you don't need. Buy the exact tools you require and if you need more in the future, just add new sets that fit seamlessly into your storage solution.

When you purchase TengTools you are guaranteed the highest quality. If a tool is worn out or if you happen to lose a piece, individual tools can be easily purchased as replacements.

# LIFETIME GUARANTEE

## QUALITY IS EVERYTHING

All our tools meet – or exceed – the demands in ISO, DIN and other international standards. As an extra security for you, our tools are offered with a guarantee against material and manufacturing defects during the normal lifetime of the product in question. Defective products covered by the guarantee will be repaired or replaced.

Adjustable wrench Comparison test. May 14, 2020. Torque breaking point (Nm). ISO 6787:2018.

## Proven to be better.

Independent tests have shown that our tools not only exceed the international quality standards – they are best in class. TengTools was positioned first or second in all of the eight product categories tested.

\* Defects or performance issues caused by accidents, not approved modifications, misuse, normal wear & tear or lack of proper care are excluded.

A guarantee claim requires the submission or shipment of the complete product to the retailer or distributor along with a receipt or invoice validating the purchase date and the product designation. Returned products are first managed by the distributor network, entrusted with applying TengTools' warranty conditions. Replacement or repair of the product will be carried out as quickly as possible.

# FOR A BETTER WORKFLOW

## BENEFITS OF A WELL-ORGANISED HAND TOOL SOLUTION:

**Time Saving:** An organised tool storage system can help you save time by reducing the time you spend searching for tools. When you have a designated spot for every tool, you can quickly locate the one you need.

**Increased productivity:** An organised workspace can help you work more efficiently and effectively. When you have a clear idea of where each tool is located, you can work faster, and the time you save can be used to complete more tasks.

**Improved safety:** A disorganised tool storage system can lead to accidents, such as tripping or falling, and injuries caused by misplaced tools. An organised system, on the other hand, reduces the chances of accidents and ensures that each tool is in its designated place, making it less likely to be left lying around where it could cause harm.

**Cost-effective:** An organised tool storage system can help you avoid buying tools you already have or replacing lost ones, saving you money in the long run.

**Better tool longevity:** When tools are stored properly, they are less likely to suffer damage from being knocked around or exposed to moisture or extreme temperatures. This means that they will last longer and perform better.

**Sustainability:** When you Get Organised™ with our long-lasting tools, you minimize the need to purchase replacements. That is sustainability in a nutshell.

# TT SERIES TOOL KITS

## BETTER TOOLS BRING BETTER RESULTS

Each tool kit has been compiled with the help of technicians from various trades and are available in many shapes and sizes. From full stacks to roller cabinets, and top boxes to portable solutions, there is a kit to fit your exact needs

### TT SERIES

---

**Space-saving:** The TT Series allows you to fit more tools in each drawer.

**Durability:** TT Series tool trays are made from a durable recyclable plastic that can withstand heavy use and are resistant to wear and tear.

**Easy to clean:** TT Series tool trays can be easily wiped clean with a damp cloth, making them simple to maintain and keep clean.

**Lightweight:** TT Series tool trays are lightweight, making the toolkit easier to move around and transport as required.

**Corrosion-resistant:** TT Series tool trays are resistant to corrosion, making them ideal for use in humid or damp environments.

# FOAM SERIES TOOL KITS

## BETTER TOOLS BRING BETTER RESULTS

Each tool kit has been compiled with the help of technicians from various trades and are available in many shapes and sizes. From full stacks to roller cabinets, and top boxes to portable solutions, there is a kit to fit your exact needs

### FOAM SERIES

---

**Protection:** FOAM Series tool trays provide a protective layer between the tools and the storage solution, helping to prevent damage and scratching.

**Organisation:** Each tool has its own place with its description imprinted in the 3-coloured foam. The contrasting colours make it easy to identify tools and see when a tool is missing.

**Customisability:** We can provide a bespoke custom FOAM Series toolkit based around your existing tools and equipment. Contact your local retailer for more information.

**Safety:** FOAM Series tool trays can also help reduce the risk of injury by keeping sharp or dangerous tools secure and separated from other tools.

**Cold environments:** The high quality FOAM stays soft and flexible even in cold environments and gives the tool kit a premium look.

# FOAM SERIES TOOL TRAYS

## A FLEXIBLE TOOL CONTROL SYSTEM WITH OVER 240 TOOL SETS

The Foam Series offers the ultimate tool organisation. Each tool has its own place with its description imprinted in the 3-coloured foam. The contrast colours makes it easy to identify tools and see when a tool is missing. The high quality foam stays soft and flexible even in cold environments and gives the tool kit a premium look.

### 1 CHOOSE YOUR STORAGE

Storages for all needs.

### 2 CHOOSE YOUR TOOL SETS

Your kit. Your way.

### 3 ORGANISE YOUR KIT

Optimise your workflow.

# IMPROVED FEATURES

## 3-DIGIT COMBINATION LOCK

Flexible Security Options - Secure your tools with our multiple lock options. Switch between combination and key locks depending on your preference, keeping your tools safe and accessible.

## FLAT ALUMINIUM DRAWER FRONT HANDLES

Aluminum handles with space for labelling ensure you stay organised. Label your drawers to reflect the contents, tailored by you.

## NEW REINFORCED DRAWER DESIGN

Our drawers are engineered to fit TengTools Tool Control Modules seamlessly. Reinforced and capable of holding up to 40kg, they're built for heavy-duty use.

The drawers are tested pulling them out and pushing them in more than 35,000 times with maximum drawer load.

## FOAM WORKTOP MAT AS STANDARD.

Upgrade to hard-wearing laminated wood or sleek stainless-steel worktops. Available in multiple sizes for a perfect fit.

### COMFORT GRIP HANDLE

Ergonomically designed for ease of movement. When used with a side shelf it creates extra space for storing longer items conveniently at your side.

### EXTRA TOOL PROTECTION

FOAM mats supplied in each drawer to protect loose tools while being stored.

### FULL EXTENSION BALL BEARING SLIDES

Each drawer is fully extendable with ball bearing slides ensuring a smooth and reliable opening, and closing action every time.

### HEAVY-DUTY CASTORS

Navigate your workspace with ease using our robust castors. Supplied with two fixed and two swivel, with brakes for stability when you need it.

### RECESSED SIDE HANDLES (TOOL CHESTS)

Fold-down side handles with 150kg capacity each.

# SOCKET SETS

## ALWAYS READY FOR ACTION

Tengtools socket sets are designed with a focus on quality, durability, and accessibility. We use high-grade materials such as chrome vanadium steel for sockets, and offer a wide range of sizes in both metric and AF measurements.

The sockets are clearly marked and easy to identify, and the sets are compatible with different types of ratchets and extensions.

## MECCA PRO™

### SOCKET SETS

# SOCKETS & ACCESSORIES

## GET THE JOB DONE, FAST

The socket range includes drives from ¼" to 1" and includes six-point sockets and twelve-point sockets, metric and imperial sizes as well as a wide range of bit sockets including Hex, TX, TX-E, and TPX.

### FRP RATCHETS

Quick release mechanism that makes it possible to release sockets and accessories with one hand

Ratchet mechanism with 45 teeth (8 degree intervals)

Lever for quick reversing between left and right-hand action

All individual parts and service kits are available and easy to fit

Fibre ratchet handle with steel reinforcement that is lighter than standard ratchet handles, but just as strong

Bi-material handle with an ergonomic design that makes the ratchet very comfortable to use, especially in cold environments

**"Hip Grip"**

All sockets are produced according to TengTools "hip grip" system, which means the socket grips on the flat surfaces of the nut rather than on the corner. This system helps to prevent damage to nuts and bolts and makes it possible to grip nuts and bolts which already have damaged corners.

**6-point sockets v 12-point sockets**

12-point sockets, common in Aircraft Maintenance and Engineering, are ideal for use in confined space and for fast lightweight work. 6-point sockets are ideal for when extra torque needs to be applied. They are designed to contact the head of a fastener well away from the corners, this dramatically reduces the likelihood of slippage and rounding over of the corners.

# TORQUE TOOLS

## MAKE THE PROFESSIONAL CHOICE

TengTools torque wrenches have become an industry standard. Whether you choose the classic version that has been a favourite for many years or the new P-Series range designed for the industrial and maintenance sectors you are guaranteed quality, accuracy and reliability as standard.

### TORQUE WRENCH

Click type mechanism to signal when the required torque is reached

Equipped with an in-built angular gauge for when tightening at specific angle is required

Reversible 24 teeth ratchet mechanism in according to DIN3122 giving 15° increments

Switch for changing between left and right-hand action. Designed to torque right hand only. Bi-Directional models are available.

Scale in Nm & ft/lb

Twist locking to ensure the set torque is maintained

Accurate to +/- 4% and conforms to ISO6789

### TORQUE WRENCH PLUS

Quick release 72 teeth ratchet mechanism with twist reverse manufactured to DIN3122

Compact head for easier use in confined spaces

Click type mechanism to signal when the required torque is reached

Industrial quality grade steel tube for added stability

Ergonomic bi-material grip for maximum comfort when in use

Easy to read Nm scale that is simple to adjust

Locking button to ensure the set torque is securely maintained

Hanging facility which can be used together with a fall protection equipment

Accurate to +/- 4% and conforms to ISO6789

## Do's and Dont's of Torque Wrenches

### DO'S

- **Use carefully:** Torque wrenches are a measuring instrument and need to be treated with care
- **Reset torque:** After use set the torque to its lowest setting. If you don't over time the springs inside the wrench can lose their normal tension
- **Store Safely:** All torque instruments should be stored in their original case
- **Keep wrench maintained:** Torque wrenches should be cleaned and calibrated on a yearly basis

### DONT'S

- **Use as a power bar:** Torque wrenches should never be used as a power bar to shift stubborn fastenings
- **Abuse your wrench:** Do not drop your torque wrench or overload the wrench with a pipe extension
- **Store in conditions that lead to corrosion:** Avoid any storage locations that are subject to high or low temperatures and high humidity
- **Use without PPE:** We recommend safety glasses when using any torque wrench or torque product

### ANGULAR GAUGE

- For measuring the degree of turn
- For use when after tightening of stretch bolts with torque wrenches that do not have an in-built angular gauge
- A static read off point, fixing magnet and a pair of angle scales make it possible to take a reading in most situations

Item ID: TQAG

# SPANNERS & WRENCHES

## QUALITY AS STANDARD

Our range has been developed over many years with DIN and ISO standards as the lowest benchmark when it comes to quality and size tolerances. This is a policy that has resulted in many top positions on best-buy lists in consumer and trade magazines. The range includes many different types of spanners for most application areas and personal taste.

### COMBINATION SPANNERS

High mechanical performance and optimized for increased accessibility complying with DIN and ISO standards

Manufactured and designed in accordance with DIN3113A in high grade chrome vanadium steel

Size clearly marked on the side of the spanner for easy & quick visibility

The ring head is offset 15° to facilitate use even on flat surfaces

TengTools "Hip Grip" feature means the contact surface grips on the flat surfaces of the nut or bolt rather than on the corner

### RATCHETING SPANNERS

'R' range contains a lever to quickly switch between left and right-hand action. With the 'RS' range you flip the spanner over to change ratcheting direction.

'R' range is offset at 15° for use against flat surfaces while the 'RS' range is straight to reach the nut flat

TengTools **Anti Slip** spanner design grips onto the surface of the nut or bolt, providing better traction and reducing the risk of the spanner slipping off the fastener.

**Slipping or losing control of a spanner can cause injury or damage to the surrounding equipment.**

## Do's and Don't's of Spanners

### DO'S

- **Use the right size spanner** for the job: Make sure you have the correct size spanner for the nut or bolt you are working on.
- **Keep the spanner clean and dry:** Wipe down the spanner after use to prevent rust and corrosion.
- **Apply pressure correctly:** Apply pressure to the spanner in the direction that tightens the nut or bolt.
- **Use the right technique:** Use a firm grip on the spanner and turn it with a smooth motion. Avoid jerking or twisting the spanner, as this can cause damage to both the tool and the fastener.
- **Inspect the spanner regularly:** Check the spanner for any signs of wear or damage. Replace any damaged tools immediately.

### DONT'S

- **Use a damaged spanner:** Do not use a spanner that is damaged or worn, as it may slip or break during use.
- **Use a spanner as a hammer:** Do not use a spanner as a hammer or pry bar, as this can damage both the spanner and the object you are working on.
- **Over-tighten nuts and bolts:** Do not over-tighten nuts and bolts with a spanner, as this can cause damage to the fastener and the tool.
- **Use a spanner in wet or oily conditions:** Do not use a spanner in wet or oily conditions, as this can cause the tool to slip and cause injury.

# SCREWDRIVERS

## MORE COMFORT MORE POWER

Unlike other brands the TengTools screwdriver blade has steel alloy wings that the plastic handle is moulded around. This allows for greater torque to be put on the screwdriver, ensures the blade is dead straight and stops the blade from moving in the handle.

Size and tip marked at the bottom of each handle for easy identification

Hole in the handle can be used in a fall arrest system, for storage and for use as a T-handle

The bi-material handle is designed for increased comfort and smooth action preventing blisters after continuous use. It gives better support and increased power transfer.

The soft black material prevents the screwdriver from sticking in the hand allowing for rapid movement

The red resistant plastic is used for the core and ensures the blade is held securely

Size marked on shaft for identification while in use

Shaft made from TengTools TT-MV PLUS steel alloy for greater strength and material flexibility

Magnetic tip designed to maximise torque transfer and reduce wear

Designed and manufactured to DIN and ISO industrial standards

**CHOOSE THE RIGHT HANDLE FOR THE RIGHT TASK**

A larger type of handle allows for more power and force to be executed with the driver while a smaller type of handle make it easier to work quickly as less force is required with the driver.

**SCREWDRIVER PHI X 120mm MINI**

- TT-MV PLUS steel alloy for greater strength and material flexibility
- Ergonomically designed bi-material handle for easy use with higher torque and faster speed
- Pocket clip
- Hole in the handle for hanging or for use with a fall protection wire if needed
- The handle is moulded around the blade to ensure straightness and to allow larger blade wings which give a higher torque capacity
- DIN ISO 8764

# BITS & DRIVERS

## QUALITY YOU CAN TRUST

All TengTools bits with a hexagonal drive are designed and manufactured in accordance with the latest industrial standards. Screwdriver bits and socket bits are classified as consumables and thus are only guaranteed to meet dimensional standards.

An extensive range of bit drivers are available in the range including ratcheting drivers, stubby drivers and folding handle drivers for greater power transfer. A selection of drivers offer the option of storing bits in the handle so you do not have to waste time searching for bits when you need them.

Bit sets supplied in handy pocket sized storage with bits that are easy to access. More belt clip sets have been added to the range to help you keep small tool sets in arms reach at all times.

# HEX & TX KEYS

## VERSATILE, STRONG AND DURABLE

TengTools wide range of hex & TX keys consists of a range of keys made of chrome vanadium steel for industrial use and a series made of chrome-molybdenum for heavy duty usage.

CHROME VANADIUM STEEL

Stronger, harder and more durable than regular carbon steels. This guarantees the high level of quality that you would expect from a TengTools item

Our cases are designed to hold the wrenches tight enough so they didn't fall out but with a flexible enough grip that they were are still easily removed

For higher torque applications it is better to use the straight end Hex keys for maximum fastener engagement

Available in metric & imperial sizes up to 36 mm or 5/8"

CHROME MOLYBDENUM STEEL

It is an alloy tool steel with chromium (Cr), molybdenum (Mo), iron (Fe) and carbon (C) alloy elements. The highest quality steel that we use. It is particularly hard and strong, but also has an amount of flex. Ideal to use when more torque is required.

Ballpoint heads are ideal for areas that are hard to reach. Fastenings can be turned at an angle of 25° in a Hex or TX key.

# PLIERS

## DESIGNED TO MAXIMISE PERFORMANCE

The extensive TengTools range includes pliers for most applications. In addition, the range includes the usual side cutters, combination pliers and slip joint pliers as well as a number of cable pliers, side cutters for cable ties, frapping pliers, nail nippers, electronic pliers, precision shears and tweezers. Two types of handles are available to choose from: slim rubber dipped as well as ergonomic TPR bi-material handles.

Made from chrome molybdenum alloy steel for maximum durability and strength

The cutting capacity is laser marked next to the cutting edge makes it easy to see which pliers you need to choose

**TPR  
GRIP**

An ergonomic bi-material handle that is more comfortable in your hand

Extra support when using greater force and a lighter weight

The total length is designed to provide maximum leverage for each pair of pliers, irrespective of whether they are combination, water pump, flat or circlip pliers

### VINYL GRIP

A light compact material that is textured to avoid the tool slipping in your hand. The slim design allows for greater access in tight spaces

**Power Grip Pliers**

- **Choose the right size:** Power grip pliers come in various sizes
- **Adjust the jaws:** Use the adjustment screw located near the handle to adjust the jaws to the desired width. Make sure the jaws are parallel and evenly spaced.
- **Apply the pliers:** Place the jaws of the power grip pliers around the object you want to grip. Close the jaws by squeezing the handles together.
- **Lock the pliers:** To lock the pliers in place, flip the small lever near the handle to the "locked" position. This will keep the pliers closed and maintain a firm grip on the object.
- **Apply force:** Use the power grip pliers to apply force, such as tightening or loosening a bolt or holding a piece of material in place.
- **Release the pliers:** To release the pliers, flip the lever back to the "unlocked" position and open the jaws by releasing the handles.

# INSULATED TOOLS

## PROTECT YOURSELF FROM ELECTRIC SHOCK

All 1000-volt tools from TengTools conform to or exceed all specifications that the relevant authorities have established. Each tool is individually tested before it is marked with a special standard tag and a marking that indicates the year of manufacture.

### INSULATED SCREWDRIVERS

The bi-material handle is designed for increased comfort and smooth action preventing blisters after continuous use. It gives better support and increased power transfer.

Size and tip marked at the bottom of each handle for easy identification

Integrated protective insulation with two colours to clearly indicate if there is any damage to the insulation

RBD shafts are ultra slim allowing for recessed screws to be accessed easily

TT-MV PLUS steel alloy for greater strength and material flexibility

### INSULATED RATCHET

Twist reverse mechanism for quickly changing between tightening and loosening

Insulation made in two parts, yellow insulating core and a red outer layer. Any damage to the insulation can be detected quickly with the visibility of the yellow core layer

72 Teeth ratchet give a working arc of just 5° making it ideal for working in confined spaces

Insulation properties have been tested in resistance to cold and fire as well as in pressurised environments

Ergonomically designed handle for increased comfort and smooth action

**Manufactured to the highest standard**

IEC 60 900 is an international standard for testing tools designed for electrical work on the production line

DIN EN 60900 is a European standard drawn up in 1995 and which states that each individual tool must be tested with regard to insulation for 1000 volts

VDE is an independent authority that tests and checks tools with regard to construction, production and packaging

### What are our insulated tools tested for?

- Insulation properties, i.e. resistance up to 1000 volts in dry or humid environments.
- Resistance to the cold, i.e. how well the tool withstands the cold
- Durability, i.e. that the insulating handles do not come loose
- Resistance to fire, i.e. how well the tool withstands fire
- Insulating properties under pressure, i.e. how well the tool maintains its insulating properties when subjected to pressure

## Do's and Dont's of Hacksaws

### DO'S

- **Use the right blade:** Choose the right blade for the material you are cutting. A fine-toothed blade for thin metal, and a coarse-toothed blade for thicker materials.
- **Wear protective gear:** Wear safety glasses and gloves to protect yourself from flying debris.
- **Use the correct technique:** Hold the saw with both hands and use long, smooth strokes. Avoid twisting or bending the blade.
- **Keep the saw blade lubricated:** Lubricate the saw blade with a light oil to reduce friction.
- **Store the saw properly:** Store the saw in a dry place with the blade covered.

### DONT'S

- **Force the saw:** Do not apply excessive pressure on the saw, as this can damage the blade or cause it to break.
- **Use a dull blade:** Do not use a dull blade, as this can cause the saw to become stuck or make rough cuts.
- **Twist or bend the blade:** Do not twist or bend the blade while cutting, as this can cause it to break or become damaged.
- **Use the wrong blade:** Do not use the wrong blade for the material you are cutting, as this can cause the blade to wear down quickly or break.
- **Ignore safety gear:** Do not forget to wear protective gear such as safety glasses and gloves, as this can increase your risk of injury.

# MEASURING TOOLS

## ACCURACY IS KEY

Our range of Measuring Tools have been developed by focusing on TengTools users requirements across the automotive & industrial sectors. All tools are available individually but are also available in the unique TengTools TT trays so you can add them to your existing tool kit or include them when you are building your ultimate tool kit.

**MICROMETER**

mm

- Friction thimble and locking nut for easy operation
- Forged frame with hardened steel and polished measuring surfaces
- Matt chrome plated scale for easy reading
- Supplied with a plastic storage case
- Designed and manufactured to DIN863

ITEM ID:	MEASURING RANGE (mm)	SCALE RESOLUTION (mm)	ACCURACY
MIR25	0 - 25	0.01	0.004 mm

**DIGITAL CALIPER**

mm AF

- 4 function caliper to measure height, width, depth and step
- Adjustable between mm and inches
- Reset button and zero set in any position
- Automatic switch off to conserve batteries
- 0.01mm reading scale with 8mm high figures
- Uses CR2032 batteries (supplied)
- Supplied with a plastic storage case
- Designed and manufactured to DIN862

ITEM ID:	MEASURING RANGE (mm)	SCALE RESOLUTION (mm)	JAW DEPTH	ACCURACY
CALD150	0-150	0.01	40	± 0.02

**VERNIER CALIPER**

mm AF

- 4 function caliper to measure height, width, depth and step
- Metric and inch scales with 0.05mm and 1/128" scales
- Frosted chrome plated scale for easier reading
- Stainless steel construction with lapped edges
- Supplied with a plastic storage case
- Designed and manufactured to DIN862

ITEM ID:	MEASURING RANGE (mm)	SCALE RESOLUTION (mm)	JAW DEPTH
CALV150	0-150	0.05	40

### FEELER GAUGE

**mm**

- Blades for measuring from 0.05mm to 1.0mm
- Hardened rolled steel for durability and accuracy
- Fold up case with tightening screw for easy storage

### DIAL GAUGE WITH MAGNETIC STAND

**mm**

- Aluminium dial indicator
- 57mm diameter dial with a turnable scale and two tolerance indexes
- An extra pointer indicates whole millimetres to make measurements simple
- The stand has central locking
- A strong magnet in the base to hold the stand in place when in use

ITEM ID:	MEASURING RANGE (mm)	SCALE RESOLUTION (mm)
DGMM	0-10	0.01

### GAUGE THREAD MM/UNC

**mm  
UNC**

- 54 blades in a handy holder with tightening screws
- Thread gauge 60°
- Suitable for measuring metric and UNC threads
- Manufactured from #45 steel for a long lasting gauge

ITEM ID:	NO. OF BLADES	MEASURING RANGE (mm)	MEASURING RANGE (UNC)
TGMMUNC	54	0.25-6.0	4-42

STMM150	150	20 x 0.8
ST200	200	20 x 0.8

**MEASURING TAPE METRIC/INCH**

mm AF

- ABS case for durability
- Rubberised grip for a more secure grip especially when wet or oily
- Tape lock and belt clip for secure storage when being used
- Power return tape for automatic rewinding
- Aligning hook for internal/external measurements
- Designed and manufactured to Cat II

**MEASURING TAPE CLOSED CASE**

mm AF

- High impact plastic case for durability
- Rubberised grip for a more secure grip especially when wet or oily
- Tape lock and belt clip for secure storage when being used
- Steel roller cage prevents damage to the case
- Aligning hook for internal/external measurements
- Designed and manufactured to Cat II

ITEM ID:	LENGTH (m)	WIDTH (m)
MT15	15	10

**TORPEDO SPIRIT LEVEL**

- Magnetic aluminium "torpedo" spirit level
- 3 magnets on the underside help fix the level to ferrous work pieces
- One horizontal, one vertical and one 45° angled vials
- Crush proof, durable vials with high transparency for easy reading
- Highly resistant to ultra violet light and fluctuations in temperature
- Shock absorbent end protectors to reduce the risk of damage
- Temperature proof vial mountings to reduce the risk of distortion

**CIRCUIT TESTER**

- Brass with steel probe and screw on cover
- Suitable for use between 6 and 24 volts
- 850mm cable with simple alligator grip
- Replacement bulb widely available (24 volt, 5 watt festoon type bulb)
- Simple to use to check if circuits are live and intact

ITEM ID:	WEIGHT (g)
9850	40

**DIGITAL MULTIMETER**

- Ideal for automotive or industrial maintenance
- Extra large digital display with 16mm digits
- Fold out stand for easier use
- Use to measure voltage in DC or AC and DC current
- Includes a diode and continuity tester
- Measure temperature with the temperature probe
- Supplied with test leads
- Uses 2 AAA batteries (supplied)
- CAT I 600 volts, CAT II 300 volts, IEC61010

# AIR TOOLS

## ESSENTIAL FOR ANY WORKSHOP

Air is a powerful and versatile resource that can help you get the job done quickly! If you need to cut through steel or machine-tighten a bolt, you will need a certain amount of torque. Choosing a tool for its convenience or cost really won't do any good if it isn't strong enough to get the job done. This range of air tools pack a real punch and have been developed to exceed the demands of a professional auto workshop.

### AIR RATCHET 3/8" DRIVE

Forward/reverse torque	ft-lb	30
Sound level *	dB	88
Vibration **	m/s <sup>2</sup>	10
Minimum hose size	inch	3/8"
Air inlet	inch	1/4"
Air consumption at 100% int.	l/min	90.6
Air consumption at 100% int.	cfm	3.2
Air consumption at 15% int.	l/min	14
Air consumption at 15% int.	cfm	0.5
Length	mm	173.9
Weight	kg	0.6

\* A weighted sound pressure level at work station in accordance with EN ISO 15744

\*\* Vibration value according to EN ISO 28927-2

Item ID: **ARRM38**

### 1/2" DRIVE MINI AIR IMPACT WRENCH

1/2"

SPECIFICATION:		
Square drive	inch	1/2"
Bolt capacity	mm	M16
Free speed	rpm	8,000
Max torque (3 steps)	Nm	285/380/680
Max torque (3 steps)	ft-lb	210/280/501
Max reverse torque	Nm	770
Max reverse torque	ft-lb	568
