DAMAGE PREVENTION INSOLES

FOOTLAB®
The

Feet are the main thing!

Did you know that during an average lifetime, our feet transport us more than 2.5 times around the world? This amounts to over 100,000,000 steps, where each step impacts your feet with a shock of 120% of your body weight. When you run, the weight increases 3–5 times. Our insoles give your feet extra stability and comfort and adjust the body's structural balance, which has a positive effect on your entire body and you can be free from problems in your feet, ankles, knees, hips, back and neck.

WE LOVE INSOLES!
